

FC44-053  
Boeing 767 Detail Sheet  
for the  
Revell or Zvezda 1/144 Scale Kit

With this sheet you should be able to decal any door style and window pattern of the 767-200 or -300. The version with the most number of windows is depicted on the decal. Remove windows where needed to make any of the other versions with 3 main deck doors on each side or 3 plus a medium-sized door, and small over wing hatch. Extra doors are provided and all will not be used. Study the other window patterns carefully and you should be able to see where windows need to be removed. Three styles of engine spinners are provided as well. Some detail are provided extra incase of error and on some pieces either a black outline or solid gray box has been provided. Use the solid gray version on schemes with a bare-metal belly.
